Projects

Employee Management & Leave Protocol System | MERN Stack, JWT, RBAC | **GitHub** | **Live** **Feb 2026 – Mar 2026**

- **Engineered** an enterprise-grade HR portal with **three-tier RBAC**, streamlining hierarchical leave workflows and expense reimbursements for Admin, Manager, and Employee roles.
- **Orchestrated** a Real-Time Notification System using **custom polling** and **centralized state management** to broadcast critical Admin updates and status changes across the platform.
- **Hardened** security by implementing **JWT-based Authentication** and hierarchical middleware, ensuring high-level data privacy and secure **RESTful API** endpoints.

FinancePro - Personal Finance Tracker | React.js, Node.js, MongoDB| **GitHub** | **Live** **Jan 2026 – Feb 2026**

- **Architected** a full-stack financial management app focused on **Data Analytics**, enabling facilitating systematized income/expense tracking and comprehensive financial auditing.
- **Developed** a high-performance frontend, integrated with a backend designed to handle complex **JSON data persistence** and high-frequency transaction logging.
- **Optimized** financial workflows by integrating **Data Visualization (Recharts)** for real-time analysis and implementing automated budget triggers and secure session handling.

Training

Data Structures and Algorithms | Lovely Professional University | Link **Jun 2025 – Jul 2025**

- **Mastered** core and advanced DSA, focusing on optimizing code performance through rigorous **Big O Complexity Analysis**.
- **Architected** and implemented fundamental structures including **Linked Lists, Stacks, Queues, and Trees**, alongside optimized searching and sorting algorithms.
- **Developed** a Student Record Management System in **C++,** achieving O (log n) or O (1) efficiency for data retrieval and record operations.

Certificates

IBM Full-Stack JavaScript Developer | IBM (via Coursera) | Link **Mar 2026**

- Architected end-to-end web applications using Node.js and React, focusing on scalable RESTful architectures and modern ES6+ standards.

Google AI Essentials | Google (via Coursera) | Link **Mar 2026**

- Leveraged generative AI tools to streamline development workflows and refined prompt engineering techniques for increased coding efficiency.

Technology Job Simulation | Deloitte Australia (via Forage) | Link **Jul 2025**

- Simulated technology consulting and system architecture workflows to deliver client-centric software solutions.

Technical Skills

Languages: C++, Java, JavaScript (ES6+), Kotlin, PHP, SQL

Web Technologies: HTML5, CSS3, Tailwind CSS, jQuery, JSON, Framer Motion

Frameworks: React.js, Express.js, Laravel, Node.js, FastAPI, Jetpack Compose

Databases: Firebase, MongoDB, MySQL, PostgreSQL

Backend & Security: RESTful APIs, CRUD Operations, JWT Authentication, Role-Based Access Control (RBAC)

Tools & Platforms: Git, GitHub, VS Code, Android Studio, XAMPP, Postman

Education

Lovely Professional University Punjab **Aug 2023 – Present**
*Bachelor of Technology - Computer Science and Engineering — **CGPA: 7.74*** *Punjab, India*

Holy Cross Public School **Apr 2022 – May 2023**
*Intermediate — **Percentage: 63.6%*** *Muzaffarpur, Bihar*

D.A.V. Public School **Apr 2020 – Mar 2021**
*Matriculation — **Percentage: 83.2%*** *Muzaffarpur, Bihar*
